

## Brainstorming & Idea Prioritization Template

|                      |                                                              |
|----------------------|--------------------------------------------------------------|
| <b>Date</b>          | 28 JUNE 2026                                                 |
| <b>Team ID</b>       | XXXXXX                                                       |
| <b>Project Name</b>  | Smart Agricultural Production Optimization Engine (OptiCrop) |
| <b>Maximum Marks</b> | 3 Marks                                                      |

### Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

| S.No | Team Member            | Idea / Suggestion                                             | Category                     | Group No. |
|------|------------------------|---------------------------------------------------------------|------------------------------|-----------|
| 1    | Nikhila Samireddi      | AI-based Crop Recommendation System using Soil & Climate Data | Machine Learning             | 1         |
| 2    | Bhavani Dunna          | Soil Nutrient Analysis and Crop Suitability Prediction        | Agriculture Analytics        | 1         |
| 3    | Sindhuja Reddy Pannuru | Weather-Based Crop Recommendation and Yield Optimization      | Climate & Agriculture        | 2         |
| 4    | Mondam Sandhya         | Fertilizer Recommendation based on Soil Nutrients             | Smart Farming                | 2         |
| 5    | Mondam Spandhana       | Agricultural Research Dashboard for Crop Performance Analysis | Research & Analytics         | 3         |
| 6    | Entire Team            | Smart Agricultural Production Optimization Engine (OptiCrop)  | Integrated Smart Agriculture | 3         |

### Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

### Brainstorming & Idea Prioritization Template

| Group No. | Final Idea                                                   | Feasibility (High/Medium/Low) | Importance (High/Medium/Low) | Priority | Selected (Yes/No) |
|-----------|--------------------------------------------------------------|-------------------------------|------------------------------|----------|-------------------|
| 1         | AI-based Crop Recommendation using Soil & Climate Parameters | High                          | High                         | 1        | Yes               |
| 2         | Weather & Fertilizer Recommendation System                   | Medium                        | High                         | 2        | No                |
| 3         | Agricultural Research Dashboard and Analytics                | Medium                        | Medium                       | 3        | No                |
